Gunlock, Utah  
Santa Clara, Utah

Commissioner Wilford Holt stated he felt the irrigators had a successful year in 1965. He recommended that the Seep Ditch and the Bloomington companies put in measuring devices. He stated that according to the Court Decree when the water in the Santa Clara River drops below 100%, the companies the companies are all to be cut at the same rate. When the water drops to 75% at Pine Valley, the lower companies do not receive 75%, and the upper companies would have to be cut so all the companies would be receiving the same percentage of their water. He tried to carry out the suggestion made in the meeting in 1962, that when the water drops to 75%, the upper companies from Gunlock to Pine Valley inclusive agree to be cut to 50%, to assure the lower companies a longer period of 50% use, and the lower companies agree that the upper companies will not be cut below 50% at any time during the season. He was not very successful. He felt that there should be a definite agreement by the companies on this problem.

It was decided to call a meeting of the companies at a later date to try to come to an agreement on this matter. It was decided that a representative of the State Engineer's Office will be present.

Meeting adjourned,

Charles Hafex, secretary.
